EBU5606 - PRODUCT DEVELOPMENT AND MARKETING COURSEWORK BRIEF - 202526

Submission: Thursday 14 May 2026 by 23:55 (Beijing time) via QMplus. *This is a single group submission, and late submissions will not be marked.*

Weighting: *This coursework contributes 30% to your overall EBU5606 module mark.*

OVERVIEW

This coursework is to be completed in groups (as allocated). It is designed to help you apply key concepts from the module, develop your analytical and communication skills, and demonstrate your ability to work collaboratively. This year, the assessment includes a video component and an AI-usage declaration to support authentic learning and responsible use of digital tools.

Your group will submit **three components**:

1. **Group Written Report** – 65%
2. **Group Video Presentation** – 30%
3. **AI-Usage Statement** – 5%

All components must be submitted for the coursework to be considered complete.

1. Group Written Report (65%)

Length: Maximum 3,000 words, including cover page and references etc.
Format: Word document
Submission: One per group

Purpose

This concise written piece should summarise your analysis, key insights, and conclusions. It is not a long report; focus on clarity and depth rather than length.

What to include

- A brief introduction to your proposed product
- Key arguments or analysis covering all tasks as required in the scenario brief below.
- Evidence, data, or examples
- A short conclusion
- Proper referencing where relevant

Assessment criteria

- Quality of analysis and argument
- Use of evidence

- Structure and clarity
- Academic integrity and referencing

2. Group Video Presentation (30%)

Length: Maximum **5 minutes**
Format: MP4
Requirement: Every group member must appear and speak in the video.

Purpose

The video allows you to demonstrate your understanding of the chosen topics in your own words. It also ensures fair contribution from all group members.

What to include

- A clear demonstration/explanation of your proposed new product/output/deliverables
- Visual aids (optional): slides, diagrams, screen recordings, etc.
- Smooth transitions between speakers

Assessment criteria

- Clarity and accuracy of explanation
- Application of concepts
- Communication and delivery
- Originality and critical thinking

You must also include a short **timestamped contribution list** (e.g., "00:10–00:35: Alex explains X").

3. AI-Usage Statement (5%)

Length: Maximum **1 page** (Font size 11 or 12)

Purpose

To encourage transparency and responsible use of AI tools.

What to include

Your group must clearly state:

- Which AI tools (if any) were used
- What they were used for (e.g., idea generation, grammar checking)
- What parts were *not* AI-generated
- How you ensured academic integrity
- A short reflection on the benefits and limitations of AI in this coursework

Assessment criteria

- Transparency and honesty
- Specificity and clarity

- Quality of reflection

Academic Integrity

All work must be your own. AI tools may be used **responsibly**, but they must be declared in the AI-Usage Statement. Undeclared or excessive AI-generated content may be treated as academic misconduct.

GROUP DETAILS

You should have been randomly allocated to a coursework group on QMPlus. Each group should then nominate a Group Leader.

SCENARIO

For the last 5 years, your group is one team in the Product Development department of a technology-led organisation specialising in Telecommunications and e-Commerce. The organisation has built a strong business based on its current range of activities, and it has a strong brand image. The role of your team is to identify an opportunity that can be developed as a new product or service that fit with your technology-led organisation.

An example of the difference between 'new product and service' and 'new product and service area':

- BT has moved into providing on-demand TV programmes, as well as their traditional phone and broadband services. This is a new area.
- BT has introduced the V-box, which is a set-top box that supports terrestrial TV broadcasts and on-demand TV over the internet. This is a new product.

DETAILED INSTRUCTIONS

Your team need to undertake a systemised process that will include **opportunity identification, customer needs identification, mission statement, concept generation and testing.** The outcome of your work will be a report that will be given to your organisation's management board to assist them in making their decision on whether to support your product concept.

OPPORTUNITY IDENTIFICATION – 10 MARKS

Task 1

Use the Ulrich and Eppinger's **six-steps process to identify at least three (3) product opportunities**. Explain in detail all steps of process followed. Use the R-W-W framework to select an exceptional product opportunity; give briefly answers to R-W-W questions when it is necessary. **Your product idea should be unique.**

MISSION STATEMENT – 5 MARKS

Task 2

Define your **project's mission statement** in detail.

IDENTIFICATION OF CUSTOMER NEEDS – 15 MARKS

Task 3

Use the Ulrich and Eppinger's **five-steps process to identify customer needs** for your product/service idea. Explain in detail all steps of process followed. Choose one appropriate method to gather raw data. Provide a clear list with the needs. Answer to the key question: Who and what customers are or

could be interested in your product/service idea.

CONCEPT GENERATION AND TESTING – **20 MARKS**

Task 4

Once your customer requirements are ready, use an appropriate approach to **generate your product concept** developing a prototype (e.g. functional prototype, drawings/ sketches, simulation, etc.). The next stage of **concept testing** should be the culmination point of your report and you should use the Ulrich and Eppinger's **seven-steps process to test** your product concept.

CONCLUSION AND QUALITY OF WRITING – **5 MARKS**

Task 5

This should summarise your **findings** and assess the **market potential** of the product, including any **shortcomings** that need further development.

ORIGINALITY – **5 MARKS**

5 marks will be awarded for the novelty of your idea, namely for the quality of being **new**, **unique**, and **innovative** product concept.

VIDEO – **30 MARKS**

A clear, well-structured demonstration or explanation of your proposed new product, output, or deliverables. Use visual aids where helpful—such as slides, diagrams, or screen recordings—to support your explanation. Your video should also showcase effective teamwork, with smooth, well-coordinated transitions between speakers.

GROUP AI-USAGE STATEMENT – **5 MARKS**

5 marks will be awarded for the AI-Usage Statement. This should clearly outline which AI tools (if any) were used, what they were used for (e.g., idea generation, grammar checking), which parts of the work were not AI-generated, how academic integrity was maintained, and a brief reflection on the benefits and limitations of using AI in this coursework.

FURTHER GUIDELINES

Before submitting, ensure your group has included:

a. 5-minute group video with all members showing up (named as: ***EBU5606_Group XX_COMPANY NAME_Video_2526.mp4)***

b. 3,000-word group written report (named as: ***EBU5606_Group XX_COMPANY NAME_report_2526.docx)***

c. 1-page AI-usage statement (named as: ***EBU5606_Group XX_COMPANY NAME_AI-Usage_2526.docx)***

1. Clear writing reflects clear thinking. Your report must be concise, well-structured, and free of unnecessary detail. The maximum length is 3,000 words, including the cover page, table of contents, summary of responsibilities, references, appendices, and all other sections. You may use figures, diagrams, and tables where relevant. One mark will be deducted for every 100 words over the limit, up to a maximum deduction of five marks.
2. Use the templates provided on QM+.
3. Your report must include in-text citations and a full List of References using the Harvard referencing style. You are expected to consult a wide range of sources—such as reputable websites, newspapers, books, and academic journals—and you **must** reference all materials properly. Guidance on using the Harvard style is available on QMplus.
4. Produce your **own** work. Do **not** plagiarise. Your proposed product concept and written report will be checked thoroughly, and any evidence of plagiarism may result in a mark of zero.
5. Marks are awarded **as a group**, meaning every member of the group will receive the same mark.
6. You are expected to work effectively as a team and take on different roles. Completing the coursework on time is essential and reflects the expectations of industry, where teamwork and meeting project deadlines are standard practice.
7. You should demonstrate strong time-management skills, hold regular meetings, engage in meaningful discussions, and manage any disagreements that arise within your group professionally.
